BUILDING OF SANITARY INTEREST

BUILDING OF SANITARY INTEREST

Construction of a new building of health interest in Inofyta, Boeotia. These are two statically independent structural steel buildings with shelters, the ground floors of which are connected to each other. The production building with areas of sanitary interest with a total area of 2000 sq.m. and gabled roof, and the two-storey office building with basement and intermediate loft with a total area of 2500sq.m. Our construction includes a special variable width architectural ledge with total length of 44.00m on the facade of the office building and in part of the production building that covers and protects the loading and unloading area. The project includes the study, design, supply and installation of the metal frame. Including cladding, siding, interior design and the permanent formwork of composite floors.
