INDUSTRIAL BUILDING - LPC SA

INDUSTRIAL BUILDING OF LPC SA

Construction of a new building in existing industrial facilities of the company LPC SA. The project includes the construction and erection of steel industrial building with a surface area of 750sq.m., the construction of equipment bases with a surface area of 82.5sqm., and steel construction of above-ground piping of 64sqm. Inside the building there are an office loft of 90sqm with a composite slab and an equipment loft of 105sqm. Furthermore there is an external balcony at the attic level for the installation of electrical equipment with grill floor. At a height of about 9.00m inside the building there is infrastructure-provision for the installation of a crane bridge.
