INDUSTRIAL METALWORK PROJECTS

LOGISTICS WAREHOUSE FOR ERGO SAFETY LTD

Personal protection equipment manufacturing plant with a total surface area of 1500 sq.m. The project included the planning, supply and installation of an extension (annex) to the existing building measuring 1500 sq.m. One of the project’s design challenges was to connect half the beams of the new roof with the metal support columns of the existing building in order to bring down costs. In order to achieve this, all necessary static reinforcements were performed on the existing building.

CLIENT	ERGO SAFETY LTD
LOCATION	ARKOUDA, MUNICIPAL DISTRICT OF MULKIOU, MUNICIPALITY OF SIKION
YEAR OF CONSTRUCTION	2016-2017
WEIGHT	75 TN
